

StayBright™Plus

LUMALITE™

The revolutionary whitening product that is the easy way to sparkling white teeth!

INSTRUCTIONS-FOR-USE:

Use this product for 3 or 4 days, 2 to 3 times a day, after in-office whitening. Or, 2 to 3 times a day for 14 days without in-office whitening.

DIRECTIONS:

1. Brush and floss your teeth as you normally would.
2. Unscrew the cap from *StayBright™Plus* and using the applicator brush apply a thin layer of *StayBright™Plus* over the front surface of the teeth, one tooth at a time, to the teeth you wish to whiten. Re-dip the brush as needed. Try not to let your lips or tongue touch your teeth.
3. When applying, allow 15-30 seconds for *StayBright™Plus* to dry on your teeth before allowing your lips or tongue to touch your teeth.

For best results, do not eat or drink for 30 minutes so that *StayBright™Plus* remains on your teeth and has time to work. After *StayBright* has been on your teeth for 30 minutes you can either brush off or allow it to simply wear off.

FREQUENTLY ASKED QUESTIONS

Q: How does *StayBright™Plus* work?

A: Once applied, the whitening ingredient adheres to the teeth and works to remove discoloration from within the tooth enamel. *StayBright™Plus* also removes unwanted stains on the surface of the teeth.

Q: How do I know how much to put on?

A: Each dip of the brush will provide enough *StayBright™Plus* to cover at least 2 teeth. You can apply *StayBright™Plus* to as many teeth as you would like to whiten.

Q: How quickly will I see results?

A: You should start to see results after a few days of using *StayBright™Plus* depending on the natural color of your teeth and the level of staining.

Q: How long can I use *StayBright™Plus*?

A: Until your teeth have reached their natural desired color. However, you should consult your dentist if you wish to continue using for more than four continuous weeks.

Q: Is *StayBright™Plus* safe on my tooth enamel?

A: *StayBright™Plus* is safe for your tooth enamel, but may cause tooth sensitivity (see IMPORTANT INFORMATION for details).

Q: Is *StayBright™Plus* safe & effective?

A: The materials in *StayBright™Plus* have been used for many years to lighten teeth and have been proven to be safe and effective. A significant improvement in tooth color should be observed after only two weeks of treatment.

Q: Is it hygienic to keep re-dipping the same brush?

A: Yes. *StayBright™Plus* contains ingredients that will kill the germs on the applicator brush. Do not share bottle with others for hygienic purposes.

Q: How long should one bottle last?

A: One bottle of *StayBright™Plus* (1/3 oz) will last for up to four weeks depending on the number of daily applications.

Q: Will *StayBright™Plus* whiten dental work such as crowns, caps, fillings, and/or veneers?

A: No, *StayBright™Plus* only whitens natural teeth.

Q: How long do I have to wait between the daily applications?

A: Since *StayBright™Plus* is normally applied twice daily after brushing your teeth, we recommend that you use *StayBright™Plus* once in the morning and once in the evening to coincide with your regular brushing regimen. If you prefer, you can apply the two applications back to back as long as you wait at least 30 minutes without eating or drinking after an application. *StayBright™Plus* can be applied up to three times per day.

Q: Will *StayBright™Plus* affect my dental work?

A: No. *StayBright™Plus* will not damage your dental work. However we recommend consulting your dentist before using any tooth whiteners.

Q: Can children use *StayBright™Plus*?

A: consult your dentist for use on children under the age of 16.

IMPORTANT INFORMATION

Maintaining your teeth:

- To maintain whiter teeth, use *StayBright™Plus* as directed every 6 months or as needed. For best results, use whitening toothpaste in conjunction with your whitening regimen.
- Tobacco, coffee, tea and red wine are among the common causes of tooth stains. Smoking, drinking

coffee, tea and red wine will provide less satisfying results.

- For even whiter teeth, use for an additional 7 days.
- Tooth stains can occur on the surface of the teeth as well as between teeth. Use the *StayBright™Plus* brush to whiten both the surface and the harder to reach places between your teeth.

Teeth Sensitivity:

- Some consumers may experience gum irritation or tooth sensitivity which usually goes away in 1-3 days after treatment has been stopped. If you are experiencing sensitivity, stop using *StayBright™Plus* and consult your dentist.

Warnings:

- Keep out of reach of children.
- Store *StayBright™Plus* in a cool place, away from heat.
- Avoid contact with eyes. If product contacts the eye, flush immediately with copious amounts of water for 15 minutes: consult physician if irritation or disturbance in vision occurs.
- Should product cause a lasting noticeable skin reaction, flush with water for 15 minutes and consult physician.
- If a substantial quantity is ingested, or in case of noticeable discomfort, drink large quantities of water and consult physician immediately.
- Avoid getting *StayBright™Plus* on clothes or other fabrics.
- People with gum disease, receding gums or those allergic to any of the ingredients in *StayBright™Plus* should not use this product.
- In case of emergency, call 1-800-535-5053 or 1-352-323-3500 (Int'l)
- OSHA HAZARD COMMUNICATION STANDARD 29 CFR 1910.1200

INGREDIENTS:

Ethanol, water, hydrogen peroxide, Carbopol, EDTA, sodium pyrophosphate, natural mint flavoring, artificial sweetener
